

1. Testing Scope

Functional black-box verification was conducted across all interactive components and conditional branches of FitBuddy.

2. Test Execution Matrix

Test ID	Test Scenario	Input Metrics	Expected Result	Status
TC-01	Application Initialization	Terminal command <code>streamlit run app.py</code>	Web server starts; UI renders at port 8501 without errors.	PASS
TC-02	Vegetarian Diet Output	Diet = "Vegetarian", Goal = "Weight Loss"	Outputs plant-based meals (Dal, Brown Rice, Paneer/Tofu).	PASS
TC-03	Non-Veg Diet Output	Diet = "Non-Vegetarian", Goal = "Muscle Gain"	Outputs high-protein meal items (Eggs, Chicken, Fish).	PASS
TC-04	Vegan Diet Output	Diet = "Vegan", Goal = "General Fitness"	Outputs dairy-free vegan meals (Chia pudding, Chickpeas, Tofu).	PASS
TC-05	Boundary Value Validation	Age = 105, Weight = 25	Streamlit numeric constraint blocks out-of-bounds input.	PASS
